EDUCATION

Deen Dayal Upadhyaya Gorakhpur University
B.Tech in Computer Science (SGPA: 8.35)

2024 – 2028
Gorakhpur, India

Projects

DocSphere – Enterprise RAG Assistant 🔗 | GitHub

React, Node.js, MongoDB, OpenAI, RAG

- Engineered a **context-aware enterprise knowledge assistant** enabling HR and employees to quickly retrieve information from internal documents through **semantic search and Top-5 cosine-similarity retrieval**.
- Built a **multi-PDF RAG pipeline** with OpenAI embeddings, page-level parsing, source citations, and **exact-page navigation** for traceable document-based answers.
- Designed **2-role RBAC authentication** with **JWT** and protected **REST APIs**, plus an admin dashboard for document upload, deletion, re-indexing, and usage analytics.
- Integrated persistent conversation management with **3–4 context-grounded follow-ups**, chat search, rename, pin/delete operations, and fallback handling for unavailable information.

InterviewIQ – AI Mock Interview Platform 🔗 | GitHub

React, Node.js, MongoDB, OpenRouter, Firebase

- Architected an **AI-powered interview preparation platform** generating **5 role-specific technical/HR questions** with progressive difficulty and **90–150 sec** timed voice/text interviews.
- Implemented **AI-driven answer evaluation** across **3 performance metrics** with **0–10 scoring**, personalized feedback, and question-level analytics to identify candidate skill gaps.
- Established a workflow with **resume analysis**, **secure authentication**, **credit-based interview access**, **Razorpay payments**, **interview history**, and **PDF reports**, streamlining interview practice and performance tracking.

CivicSync – Smart Workforce Management 🔗 | GitHub

React.js, Node.js, FastAPI, PostgreSQL, Scikit-learn

- Built responsive **React.js dashboards** for real-time workforce monitoring, task tracking, performance visualization, and geo-tagged field activity analysis.
- Implemented and integrated **8+ RESTful APIs** using **Node.js** and **FastAPI** for workforce, task, and activity management, enabling structured frontend-backend data flow.
- Developed **PostgreSQL-backed workforce services** and applied **Scikit-learn** models for task allocation and worker performance scoring, enabling data-driven workforce planning.

Open Source Experience

Social Summer of Code – 2026

🐙 GitHub

- Resolved responsive header and navigation issues in an **open-source React/TypeScript project**, improving mobile usability and layout consistency.
- Enhanced frontend components and successfully **merged Pull Request #141** through Git branching, commits, and code review workflow.

Achievements

India Innovates Hackathon 2026

New Delhi, India

- Secured a **top 10 rank among 10,000 participants** in a national-level hackathon conducted with the Delhi Government.

GirlScript Summer of Code 2026

- Selected as an **Open Source Contributor** for a **national-level program**, contributing to real-world software projects through collaborative development.

Technical Skills

Languages: C, C++, JavaScript, Python, TypeScript

Frameworks & Technologies: React.js, Node.js, Express.js, Redux, MongoDB, Firebase, Tailwind CSS

Generative AI & Tools: OpenAI API, LangChain, Prompt Engineering, AI Agents, E2B Sandbox

DevOps & Tools: Git, GitHub

Cloud & Hosting: Vercel, Netlify, Render
